

DL+ Ticket Wallet Template

Please add 3mm Bleed where necessary

The Ticket Wallet is glued on both sides of the Pocket and Velcro or Pop Fasteners can be added to the Folder flap.

BLEED: Where your image/background colour or graphics go right to the edge of the Folder, all printers need 3mm of 'extra' graphics to go 'over the edge' so that when documents are trimmed, there is no danger of leaving a white line along the edges.

QUIET AREA: We would advise that with text boxes or important areas of pictures and graphics, you leave at least 10mm of space from the edges and folds of the folder.
